## Bargello Canvas Work

Bargello work is also known as Florentine or Hungarian embroidery. The most correct general term is Florentine canvas work although Bargello work has been the accepted name for years. The de-

sign given here, in general came from a piece of work dating back to days of the illustrious Medici family. The name Bargello is derived from the old Bargello Museum in Florence, Italy, where many fine pieces are on exhibition. It was first used for pillow tops, then for upholstery and bags.

Traditionally, several shades of one color are used to give a gradual ombre effect. Exciting effects depend upon careful use of color. Unusual designs are created by cleverly shading colors.

This work is composed of long and short perpendicular stitches covering 2 to 6 meshes of canvas. Stitches are laid lengthwise following weave of single-mesh canvas. Use flat and vertical stitches (see chart). The bag shown was worked on canvas 10 meshes to inch. Other combinations can be worked out.

Design should be worked in peaks, starting at center and working to a point upward, then go back and fill

## Bargello Bag

(Continued from Page 10)

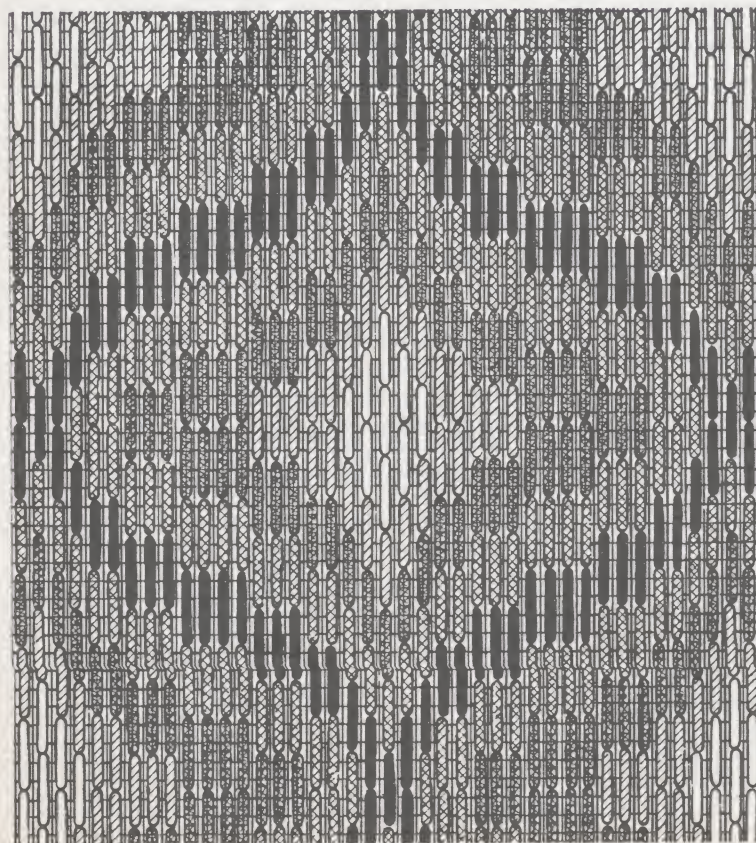

in spaces. First row establishes design. Cut yarn into 24-inch lengths. Use blunt point or number 22 tapestry needle. If wool is not pulled too tightly, design can be worked without a frame. Pull wool snug but never force yarn as it will pull design out of shape. Unlike needlepoint, Bargello cannot be blocked into shape. If canvas weave shows between yarn, stitches are being pulled too tightly or thread is twisted. Thread must be kept soft and relaxed.

Bargello embroidery can be worked from a chart or photograph. Design given is to be worked from chart.

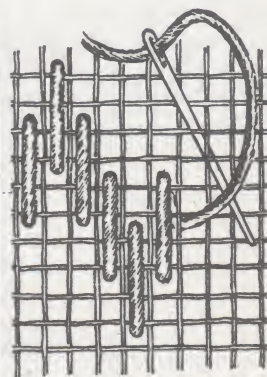

Materials required for this bag are single-mesh canvas 30 x 12½ inches (piece used was 36 inches wide, handles were made from side pieces in desired length), 1 skein each

dark green, light brown and beige tapestry yarn, 2 skeins each medium green and medium brown tapestry yarn, blunt pointed tapestry needle (number 22), block of wood 12 x 4½ inches with rounded corners (soft pine is ideal) and 14 upholstery tacks.

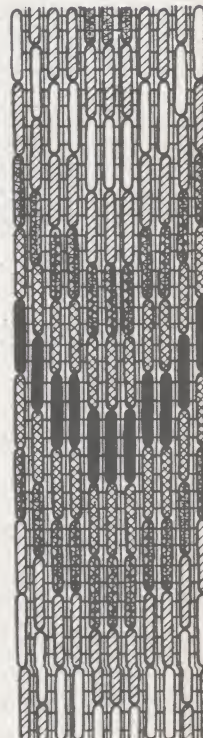

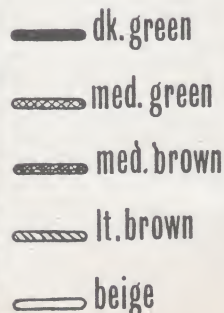

After embroidery is worked, steam press piece. Seam bag down side, matching pattern. Block of wood may always be cut down to fit. Make lining for bag. Line handles. Top stitch handles. Stitching doesn't show and makes handles more firm. Place handles between lining and worked piece. Stitch at least twice around top on sewing machine. Turn lining and after stitching around bottom of worked piece (only), pull lining down over wood, then pull worked piece down over that and tack two pieces to wooden bottom on outside. Space tacks evenly around. Lining may be trimmed closely with sharp scissors.

# KAFFEE KLATCH

It is easy to see why the kaffee klatch holds a special place in the housewife's heart. No matter how engrossed she becomes in her role as a homemaker, she can share her problems and highlights with others over a relaxing cup of coffee and a coffee cake or sweet roll. The coffee get-together, however, is not a mode of entertaining exclusive to the housewife. It is a widely accepted form of entertaining large groups of both men and women. For example, the after-church group uses the kaffee klatch as an informal and friendly way to welcome visitors. So, gather together a group of friends and serve them some of this month's featured recipes with a tasty cup of freshly brewed coffee.

Prune Coffee Cake—perfect for a tasty brunch treat and so nutritious too.

## Prune Coffee Ring

- ½ cup milk
- ½ cup sugar
- ½ teaspoon salt
- ½ cup warm water
- 2 packages or cakes active dry or compressed yeast
- 2 eggs
- ½ cup (1 stick) margarine or butter, melted
- 3¾ cups unsifted flour
- 2 teaspoons grated lemon peel
- 2 teaspoons grated orange peel
- ½ cup chopped pecans
- ¾ cup pitted, diced, cooked prunes

Scald milk; stir in sugar and salt and cool to lukewarm. Measure warm water into small warm bowl, sprinkle or crumble in yeast; stir until dissolved. Combine lukewarm milk mixture, dissolved yeast, eggs and margarine or butter in mixer bowl. Blend on medium speed of mixer. Turn to low speed and gradually beat in 1½ cups flour. Measure off ¾ cup batter and set aside. Add lemon peel and 1¾ cups flour to remaining 2 cups batter; using a wooden spoon, beat mixture well. Add orange peel, pecans, prunes and remaining ½ cup flour to reserved ¾ cup batter. Blend thoroughly. Cover both mixtures; let rise in warm place, free from draft, until doubled in bulk, about 1 hour.

Turn out larger portion onto very well-floured board. Roll to a 10 x 18-inch rectangle. Spread with prune-nut batter. Roll up dough, jelly roll fashion, from 18 inch side, seal seams tightly. Place seam side down in greased 10-inch tube pan. Cover, let rise in warm place, free from draft, until doubled in bulk, about 1 hour. Bake in moderate oven (350° F.) for 30 minutes or until done. Cool. Ice with confectioners' sugar frosting, if desired. Makes one 10-inch ring.

**To make 25 (5-ounce) cups:**

**4 quarts boiling water**

**1 jar (5 ounces) instant coffee**

**10 quarts boiling water**

Place instant coffee in large container; add water. Stir to blend. Let stand 1 to 2 minutes. Serve piping hot. If a milder coffee is desired, increase amount of boiling water until correct strength is obtained.

The ever-popular mocha flavor is enhanced in Mocha-Raisin Nut Bars with raisins and chopped nuts.

**1 package butterscotch or white cake mix**

**1 cup freshly brewed or instant coffee, cooled**

**2 eggs**

**1 cup raisins, chopped**

**1 cup nuts, chopped**

### Coffee Glaze

Combine cake mix, coffee and eggs in mixing bowl. Blend at low speed to moisten. Beat 3 minutes at medium speed of mixer or vigorously with spoon until creamy. Mix in raisins and nuts. Pour batter into two 13 x 9-inch pans which have been generously greased and floured. Bake at 350° F. about 25 minutes, or until top springs back when pressed gently with finger. While cakes are still warm, spread Coffee Glaze over tops. When cool, cut each cake into 30 bars. Makes 60 bars.

**3 cups unsifted confectioners' sugar.**

**2 tablespoons butter, melted**

**1/4 cup freshly brewed or instant coffee, cooled**

**2 teaspoons vanilla**

Measure sugar into small bowl. Gradually add butter and coffee, beating until smooth. Blend in vanilla. Makes about  $\frac{2}{3}$  cup glaze.

# FLOWER and GARDEN

How often should I water a dipladenia splendens? Mrs. A. P., NY

Keep evenly moist, feed every other week during spring, summer and early fall. Grow on dry side with no fertilizer through winter. Humidity is very critical—50% or more and mist leaves with tepid water daily through winter months.

I planted blue clematis on the east side of porch. The leaves soon turned yellow and it grew tall and spindly. Putting iron around it did not help. Could you tell me what is wrong? Mrs. N. F., Colorado.

Clematis needs deep loam well enriched with rotted cow manure and made porous with a generous supply of limestone chips mixed through the medium. Plant crown two inches deep and gradually fill in so it is well buried. At end of first year cut vine back to six inches or so and if it is puny at the end of second year cut it back again. Use plenty of Sequestrene each winter and in spring feed with 5-10-5 plant food.

I should like to start an azalea plant from an old one. Can this be done, if so, how? Mrs. M. L. L., Pennsylvania

The surest way is to layer it. Pull down a side branch, bend it so it can be buried at least three inches deep but leave the leafy end out. Fasten it down with a bent wire, and put a brick over the buried portion. Two years later you can cut off the new plant. Cuttings taken in mid-May and rooted in a mixture of peat moss and perlite are easy too, but only work with the Kurumes, the Kaempferis and some few of the deciduous sorts.

I started a nutmeg tree from seed. It is a year old and looks healthy but has only one leaf at a time. What could be wrong? Mrs. L. J., IL

Nutmeg makes a poor pot plant as it tolerates no root interference. It makes a poor house plant as it demands temperatures above 80° F., with extremely high (50% or more) relative humidity. Like other tropical trees, avocado, etc., you can carry on for a while, but never expect fruit.

Please give culture for Easter cactus. Mrs. A. B., NB

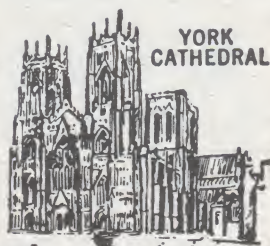

Grow out-of-doors through summer in partial shade. Keep soil in pot moist and feed every three weeks with diluted house plant food solution. When growth slows in September, withhold water (do not allow plant to shrivel) and bring indoors. Place in bright window in a cool room (extra light prevents bud formation so keep away from rooms that are lighted at night). Resume watering when buds appear; resume feeding as they color up.

Please tell me when and how to propagate a lipstick vine. Mrs. B. W., OH

Root stem or tip cuttings in a mixture of damp perlite and milled sphagnum. Do this in a deep clear plastic cake box as humidity must be very high and temperature must be at 80° F. day and night.

# Charming Clematis

These ever-popular, colorful, flowering vines originated in gardens of Europe. They are outstanding in color and form. And with reasonable and adequate care, produce pleasing eye-catching results for years and years. They are perfect for trellises, arbors, old tree stumps, posts and walls where they can flaunt their beauty in high places above other flowers. There are also herbaceous non-climbing varieties which are well suited as a backdrop or as a large border planting. These, however, are not as well known or as popular as large flowered clematis.

The President, one of the most popular and dependable of all clematis.

Some varieties, such as Ramona, Crimson King and Nelly Moser have extra large 6 to 8-inch blooms. Also available are small flowered kinds such as Virgins Bower with bloom size ranging from  $\frac{1}{4}$  inch to 3 inches in diameter. They have curiously formed flowers which are produced in great abundance.

Colors range from white through pink to crimson and purple. White varieties include the Duchess of Edinburg, which has a double flower and Lanuginosa candida; purple varieties such as Jackmani,

The President, Ernest Markam and Mrs. R. T. James, the new double blue clematis, seemingly are most popular with gardeners. Other shades include crimson as in Crimson Star; mauve as in Nelly Moser; and bicolored clematis such as Clematis Florida Bicolor whose flowers have appearance of a rosette.

Clematis are also popular not just because of their beautiful flowers and brilliant colors but because with a few basic requirements they are really quite easy to grow.

They like rich loam that drains well. If soil is heavy, mix it freely with peat moss or any other humus. If drainage is poor, place pebbles in bottom of prepared hole. Make planting hole larger and deeper than necessary for size of roots. Fill with rich garden loam to which a cup of lime has been added. This will provide an excellent root run which will make for luxuriant, rich-colored flowers. Provide something for it to climb on at same time you are planting. It is generally recommended by nurseries to cut back three-quarters of top growth at planting time. Some varieties come out in spring from old wood, others do not. After clematis has been placed in ground with crown covered with  $\frac{1}{2}$  to 1-inch of earth, a light mulch of peat moss helps to retain moisture and provide a cool root run which is so important to clematis growth.

Each spring fertilize lightly and add a cup of lime. In fall, protect base from frost with pine boughs or hay.

For a striking, breathtaking effect, two or three varieties can be grown together in same spot quite easily.

## Tiny Tots Gladiolus

Betty Brinhart

If you are very fond of gladiolus, but find them too large for floral arrangements, give new Tiny Tots strain a try this year. These miniatures are perfect for any flower design you wish to make. Spikes are graceful, slender and wiry. Florets, although small (about 1/3 size of standard gladiolus) are extremely lovely. Colors are so pure and sparkling they almost seem artificial.

Pure and sparkling colors make Tiny Tot Gladiolus perfect for floral arrangements.

The seven which I consider most worthwhile growing are: (1) White Lace — a heavily ruffled creamy white that is very graceful and perfect for indoor arrangements. (2) Dancing Doll — a petite, light, shell-rose pink with a carmine rose throat. Petals, which are slightly ruffled, are very firm and crisp. Usually you can count on at least 8 to 9 florets from one spike. (3) Tinsel — has blazing scarlet petals with a throat of yellow. It has beautifully ruffled, heavily-textured florets that are everlasting. (4) Hoax — florets are a dainty old rose color with a chartreuse green throat. It produces two or more branches besides main

spike, thus giving more florets per corm. (5) Greenbird — a must for that professional look in home floral designs. It has uranium-green florets with red stripes in throat and red flecks in lighter green petal edges — a very striking combination that adds beauty and interest wherever used. (6) Pepper Red or Pirate — dark red with darker shades on throat and on petal edges. Florets have a dainty ruffling that is very attractive. (7) Edgelight — a lightly ruffled cream color with a light yellow throat and red petal edges. One of the few miniatures that florists use for cut flowers.

These charming miniatures require same planting and after care, as standard glads, but take up less room. Use them as accent plants in border, in clusters beside garden gate, or patio, or in front of wooden fences.

These dainty spikes will produce longer if cut when first two florets have just opened. For best results, gather them during early morning hours. Cut spikes on a drastic slant to increase water absorption, then place them immediately in a pail of warm water. When you get them indoors, pour in more warm water until it reaches lower florets, then store in a dark room for several hours before arranging.

After design has been completed, pour in water to which a flower preservative has been added, or simply drop in two cubes of table sugar. Change water daily. Remove all faded florets and cut spikes a little shorter each day so that design will not become leggy. When spikes become too short for design, float them in a shallow bowl of water.

Although these Tiny Tots gladiolus are relatively new, they can be purchased through most bulb companies or your favorite garden shop.

# Make a Grape Cluster

Many beautiful and expensive looking home accessories such as lamps, clocks, flowers, fruit, statues and grape clusters can be made at home to look like venetian glass. You can create your own designs by using new liquid casting plastic that pours from a can and sets itself at room temperature to a rock-like hardness when a hardener is added. The grape cluster (shown in photograph) may be used as a centerpiece on table or mounted on background of wood, burlap, textured fabric or other suitable material.

This and other decorator items, are sold in kits with complete instructions and all necessary items for making an attractive accessory. They are inexpensive to make as compared to ones bought in a specialty store. Molds and all necessary supplies may be purchased separately, if desired, through a local craft and hobby store or mail order craft supply company.

When opening kit, check to be sure it contains all items necessary before starting. It should have glass molds (this kit has 21), grape leaves, ghostwood branch, can of liquid casting plastic, hardener, dye (choice of several colors), green florist's wire, stirring sticks and eye dropper. In addition, you need a large, heavy paper cup or glass measuring cup

(do not use plastic) to mix liquid plastic, dye and hardener in. This container should have a pour spout. If using a paper cup, form a pouring spout by squeezing on opposite sides of cup. Cover work area with several layers of newspapers. Be certain room is well-ventilated.

Place glass molds (bulbs) in upright position in box or place upright in paper cups or egg carton. Cut each piece of florist's wire in half. Using small pliers, form a small hook on end of wire. Insert hooked end of wire into bulb approximately  $\frac{1}{2}$  inch below neck of bulb. Bend remaining wire at right angles so that each wire will rest on top of bulb next to it. Remove wires and set aside.

Pour liquid plastic into mixing container. Using eyedropper, add dye, one drop at a time. Count drops carefully so you can make next pour same color. Usually one or two drops per ounce is sufficient. Lighter colors allow light to shine through the molded balls. Also, when hardened, grapes will be darker than they appear when mixing. Using stirring stick, mix dye and liquid plastic thoroughly. Add 4 drops of hardener for each ounce of liquid plastic. It is important that hardener be thoroughly mixed with liquid plastic and dye. Pour mixture into molds so that solution is about the width of a dime below neck of bulb. Be sure no liquid plastic gets on outside of mold or it will break glass. Insert hooked end of wire into each bulb, allowing other end of wire to rest on top of bulb next to it. Do not leave balls in direct sunlight, under a bright light or in a draft. Let harden at least two

hours or longer. Shake them to see if they are ready. If cast rattles inside glass bulb, they are hard. When balls are fully cured, carefully break away glass.

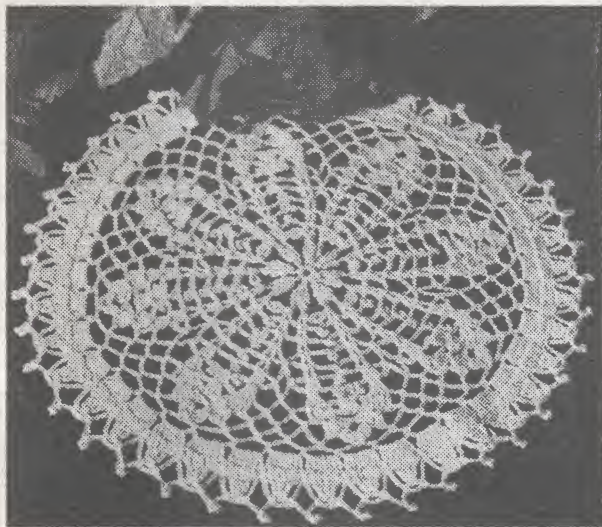

In addition, you may want to add several coats of varnish to ghostwood if a darker, shiny effect is desired. Grape leaves may be dipped in gold antique dip to give them a

rich gold-tipped look. Wire grape cluster together by wiring grapes together one at a time or in groups of two or three. Twist leaves in desired pattern and wind ends of grape stems around ghostwood. Tendrils may be formed from florist's wire.

**Editor's Note:** Grape Cluster Kit No. 6252; amber, blue or green; \$5.95 each plus postage of \$1.00. Send check or money order to: American Handicrafts Co., Dept. WB, 1011 Foch Street, Fort Worth, Texas 76107.

# Grandmother's Rose Beads

Willard and Elma Waltner

Our grandmothers used roses in their gardens for many things besides bouquets. Fresh rose petals were distilled to make perfume. Dried petals, mixed with spices and lavender, stored in airtight containers, were ancestors of our "air fresheners". Occasionally grandmother removed cover and soon room was filled with a faint fragrance, reminiscent of sunny summer days, even in midwinter. She used the same mixture to fill little cloth bags. Tucked in among sheets in linen closet, or among her hankies, they were her sachets.

Completed Rose Beads.

Roses in the garden were the "makings" for beads, too. Various methods were used for making beads. Perhaps you may wish to make rose beads in "rose season". The recipe we have followed is very simple.

Gather petals when roses are in full bloom. Use only one color. Dark red roses will be more nearly black when finished. Other colors will dry lighter shades.

Pull or clip petals from rose centers and discard latter. Run petals through food grinder, using finest blade.

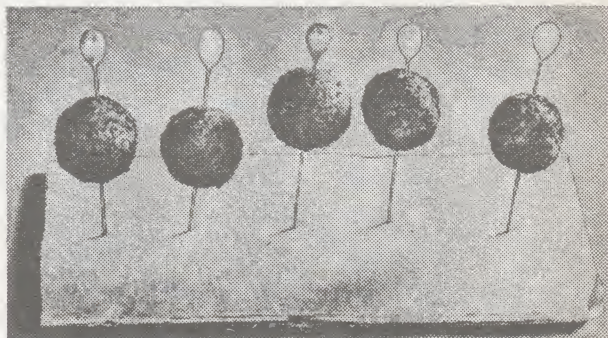

Work and knead petals. If not moist enough to hold together, add a little water, continue to press and knead until a teaspoonful or so of

mixture can be picked up and shaped into a ball. Press and roll "dough" into bead shape, squeezing out as much moisture as possible (photograph 1).

Photograph 1.

Run a glass-headed pin (they are larger than ordinary stickpins) through bead center. Push point of pin into a sheet of corrugated cardboard to hold bead upright for drying (photograph 2).

Photograph 2.

Make beads uniform or in a variety of sizes, as desired, but make larger than desired size for stringing as there is considerable shrinkage while drying. Set aside in a dry, warm place where they will not be disturbed until dry. Depending on temperature and humidity, this may require from several days to several weeks.

String beads with small gold, crystal or pearl beads between each. They may be made into a choker style necklace, a double strand, or a single long strand.

These rose beads are unusual, attractive and guaranteed to be a "conversation piece."

magic. Once they have homed-in on the rays, the 1,250 volt charged grid will instantly electrocute insects on contact, yet is perfectly safe for people & pets! Compare this with other traps of only 300 to 600 volt power which simply stun many insects temporarily. Our new tri-color tubes attract a much wider variety of insects than ordinary single color lights. Extensive research by universities and agricultural research entomologists has proven certain colors of light will attract some species of insects more than others. We have incorporated the three most desirable colors—blue, green & high-angstrom invisible black-light rays!

**BLACK-LIGHT INSECT TRAPS** were originally developed for commercial use. These \$1000 to \$2000 huge traps are used at ball parks, race tracks & other public areas. Expensive, but they do the job! A number were used at the N.Y. World's Fair where they proved amazingly effective for a 2-year period. Now this smaller trap for home use has been developed. Over 100,000 are now in use in hospitals, restaurants, motels, farms, on patios, in gardens, at swimming pools & most of all, in homes like yours, indoors or outdoors.

We wish to quote in part from an article from a nationally distributed garden publication with the largest circulation in its field: "We put our trap into operation about mid-July of last year. We were

amazed at the effects. We could open our windows; no moths or mosquitoes entered. We could sit outdoors & truly enjoy it. Our trap captured from a pint to a quart of flying insects every night!"

**OUR NEW SUPER-POWERED MODEL** is eye-catching! Sturdily constructed & finished in an attractive antiqued 'basket-weave' pattern, it is decorator designed & approved, and has the charm & elegance of expensive swag lamps which have become so popular recently. Hang it anywhere with pride! Its soft, colorful light makes it ideal as a night light. It measures a compact 12" high & 7 1/2" wide, yet its tremendous blitz-like action has the amazing ability to destroy thousands of insects daily. Hang one in your home, garden or patio. You'll find it ornamental & practical.

**KILL-RAY WILL GIVE YOU MANY YEARS OF TROUBLE-FREE SERVICE.** There are no moving parts to fail, and is completely silent & odorless in operation. It is transformer-operated for maximum durability & safety. Additional tubes are available from us at \$2 postpaid.

**OUR SUPPLY IS LIMITED.** Orders will be filled on a first-come, first-shipped basis. We anticipate far more orders than we will be able to fill. Orders from hospitals, institutions and farms will be given first priority. Order now . . . the sooner you start, the better. Destroy these pests now before they're able to lay their damaging eggs. Similar units have been sold for \$25-\$35; take advantage now of our pre-season offer & save \$5 on 1 unit and \$12.40 on the purchase of 2 units. This pre-season offer may not be repeated.

**GUARANTEE**  
We invite you to try our Black-Lite Insect Trap for a full 14 DAYS at absolutely no cost or obligation on your part! At the end of 14 days, you are the sole judge; you must be completely satisfied. If you cannot honestly say that you are now enjoying the pleasure of insect-free living: If you do not agree with us that our KILL-RAY Insect trap is worth many times our low introductory price, simply return the unit to us via Insured Parcel Post and you will receive your full purchase price by return mail!
